

# Good Thing

Lately I've been thinkin' 'bout  
Ain't it funny how things in life work out  
When we don't give in to fear or misdirection?  
Listenin' to the little voice inside  
Yeah, the one that keeps you up at night  
Beggin' for you to make that connection...

And you know it's never easy, so you gotta believe.

(Chorus) It feels like everything's about to change,  
My heart ain't listenin' to my brain  
Well, maybe that's a good thing...  
People gonna tell you how to live your life,  
You're goin' down a road that they ain't tried  
Well, maybe that's a good thing...

Seems like you're runnin' up against the wind,  
But you're gettin' up and givin' it your best again,  
Even though you're feelin' that frustration.  
You've been worn down, beaten up, in and out of bad luck,  
But you're kickin' and alive with that love  
Pullin' you through every situation...

By now you know it's never easy, so you gotta believe.

(Chorus)

"Comfortable" is another word for status quo  
And we ain't ever gonna grow if we can't shake it.  
Beneath the lies and the disguise of butterflies  
And endless tries lies a chance if we just take it...

(Chorus with "Standin' on the edge about to risk it all, you're feelin' a  
little bit afraid to fall...")
